SKILLS

JavaScript

React

Node

GraphQL

Apollo

.NET

SQL

Python

Snowflake

Nest.js

Databricks

WORK EXPERIENCE

Software Architect

Konrad Group

11/2024 - Present

Toronto, ON

Achievements/Tasks

- ◇ Modernized enterprise digital platforms using React, Next.js, Sanity CMS, and a shared design system, reducing new page creation and content delivery from days to minutes.
- ◇ Developed a high-throughput product availability service with Node.js, Redis, and DynamoDB, reducing API latency from 30+ seconds to 120ms.
- ◇ Optimized data workflows using Snowflake and Databricks to process 300M+ monthly transactions, improving reliability and enabling real-time customer insights.
- ◇ Introduced new development workflows using Claude Code across 6 engineering teams of ~50 engineers, reducing PR turnaround time from 1 week to 2-3 days and enabling consistent code quality through shared CLAUDE.md standards.

Software Engineer

Talent Systems

02/2023 - 09/2024

Toronto, ON

- ◇ Optimized workflow by streamlining initial project creation requirements resulting in an 84% reduction in the time it takes to begin new projects on casting networks.
- ◇ Worked closely with product team to create new incentives for premium subscribers, including health benefits through our Thrive program leading to a 20% increase in user retention month over month.
- ◇ Established guiding principles for designing our reusable components using atomic design creating a more cohesive component library.

Senior Software Engineer

Harness.io

01/2022 - 12/2022

Toronto

- ◇ Delivered Argo instance importing and credential templates on our GitOps product working closely with product and sales team resulting in the closing of over 2.5 million dollars in sales.
- ◇ Spearheaded improving our quality and testing practices by implementing and guiding the team on unit testing and E2E testing with Cypress, resulting in code coverage increase from 0% to 80%.
- ◇ Worked alongside staff engineers to create frontend architecture documentation to better guide our teams on writing more readable and maintainable React code for future iterations.
- ◇ Managed our own infrastructure for our GitOps instance on GCP deployments and canaries release strategy.

WORK EXPERIENCE

Software Engineer

CircleCI

07/2020 - 01/2022

Toronto, ON

- ◇ Enhanced new user onboarding experience by developing a one button first build experience. Increased user engagement by 40% and a 10% lift in overall top-level company metrics.
- ◇ Led the development of our experimentation architecture including documentation, best practices when creating Optimizely experiments on the frontend.
- ◇ Contributed to our testing framework package for Optimizely using React, generating a consistent testing framework used across all micro-frontend projects at CircleCI.
- ◇ Managed our own deployment and release strategy using AWS using canary deployments and staged releases to small percentage of our user base.

Senior Software Engineer

HomeX

08/2019 - 07/2020

Toronto, ON

- ◇ Structured the underlying architecture for the consumer app at HomeX written in React, resulting in clarified codebase and improved performance which reducing load times by 71%.
- ◇ Led consumer-facing initiatives delivering an account and billing system creating a direct to consumer sales, no longer requiring the use of third party providers.
- ◇ Contributed to our efforts to write backends for frontends micro services in .NET and Node establishing faster development of new features.

EDUCATION

Computer Programming

Georgian College

2015 - 2017

Barrie Ontario

- ◇ Presidents List Graduate
- ◇ 4.0 GPA

PERSONAL PROJECTS

ScrollJS

- ◇ Smooth scrolling library
- ◇ Native DOM binding for smooth scroll effect

MediaJS

- ◇ Library for styled components media queries
- ◇ Allows for consistent breakpoints across your application in a declarative way

slack overflow

- ◇ A slack integration for Stack Overflow
- ◇ /ask and it will bring up a list of possible solutions to your question
